<About me />

I'm a multidisciplinary programmer specialized in front-end development with frameworks like Vue, Nuxt, React or Next.js.

In the professional realm, I'm a hardworking, highly organized, creative, and detail-oriented individual. I'm passionate about fully engaging in the projects I participate in, especially when I find both creative and professional motivation. I have the versatility to work effectively both as part of a team and independently.

On a personal level, I consider myself a cheerful, communicative, and sociable person. Outside of work, I dedicate my free time to my passion for singing and playing guitar. I also enjoy watching movies and TV shows, and playing video games.

<Work experience />
